

OBJECTIVE

Driven SAP professional with experience as SAP Master Data Governance (MDG). Seeking a challenging MDG functional role where I can leverage my expertise in MDG to contribute to efficient master data governance solutions.

SUMMARY

- SAP MDG Functional Consultant with overall 3+ years of experience on Enhancement and rollouts project.
- Worked on MDG Material and Business Partners (Customer and Vendor) modules.
- Worked on both standard and customization of Data Modeling, UI Modeling, Process Modeling, BRF+ rules configurations, Workflow configurations (BRF+) and Configuration of DRF (Data Replication Framework).
- Evaluated technical architecture and provide recommendations for MDG implementation.
- Involved in gathering business requirements and converted to user and functional requirement specifications documents.
- Data Remediation, Mass Load (MASS and File upload), Data Propagation to other Systems.
- Worked on SAP Solution Manager, Testing tool with ALM, Agile process with Jira.

SKILLS

- SAP MDG
- SAP SOLMAN
- SAP ABAP

PROFESSIONAL EXPERIENCE

PROJECT DETAILS

- **SANOFI** - Pharmaceutical and healthcare company.
 - Currently utilizing SAP S4HANA for Enterprise Resource Planning.

Application Development Analyst

Accenture Solutions Private Limited

Full Time (Sep 2022 – Till date)

Responsibilities

- Gathering requirement from clients and preparing design based on the requirement.
- Specializing in SAP MDG-M and MDG-BP, by analyzing client requirements and optimizing the BRF+ and Workflow configuration.
- Obtaining the requirement and writing logic for Validation and Derivation rules and giving handover to the tech team and testing it over the environments and debugging if needed and helping to give a detailed issue to dev team to quick solution.
- Maintained a comprehensive RICEFW document, capturing and integrating new requirements to support project evolution & handover to the Integration team of the requirements and test the interface E2E.
- One of the main requirements from the client is to translate the MDG System to French to make easier for the end user and we had worked on all the custom table, values, CR type and steps to translate it to French.

- Addressing defects and implementing new requirements during the UAT phase of the project, while ensuring timely resolution and testing it and moving to UAT env.
- Configured DRF for the data propagation to multiple middleware and ensuring it reached partners with expected data.
- Data remediation activity and Mass processing with MASS transaction and File upload for the data quality.
- Took ownership of Cut-over activities, ensuring data integrity and system stability during critical project phases and aligning with evolving project requirements.

Application Development Associate

Accenture Solutions Private Limited

Full Time (May 2021 – Aug 2022)
